Ice Cream Makes the World a Better Place

Wouldn't the world be a better place if everyone was happy? And what makes everyone happy? **ICE CREAM!** To make the world a better place I want everybody to be able to have ice cream EVERY SINGLE DAY! I think that every house needs a robot that gives out ice cream whenever someone wants it. This special robot is called an I-Robot (for I get Ice cream whenever I want it). Even little kids can use it with the touch of a button. But be sure to keep your I-Robot out of the sun so the ice cream doesn't melt!

The I-Robot will have every kind of ice cream flavor you could want. (It's favorite flavor is strawberry, my favorite is chocolate). You can get it in any type of cone or a bowl. It will have all your favorite toppings, like chocolate chips, sprinkles, chocolate syrup, graham crackers, and marshmallows. As much as you want! However you want! Every day!

Ice cream makes everybody happy. It's really hard to be sad or mad when you have delicious ice cream from an I-robot. And happy people will definitely make the world a better place.
